8	GEG	SEA	224	GEG -> SEA
9	GEG	SLC	580	GEG -> B0I -> SLC
10	PDX	B0I	340	PDX -> B0I

I added 2 extra flights in the table being the direct flight from Seattle to Denver and the return flight from Spokane to Seattle. I added the direct flight from SEA to DEN to test if the query will find the path with the shortest distance rather than the one with the fewest stops. The return flight is meant to create a cycle so I can test if the code stops looping after 8 flights.
